THE LUTHER GULICK CAMPS

SOUTH CASCO, MAINE

NOVEMBER, 1939

AFTER CAMP

Camp seems very quiet after August twenty-fifth, but actually there is a great deal going on. From the day the girls leave for home preparations for the next summer are immediately started. As this News Letter goes to press a great deal of work has been completed. All the boats have been painted and repaired and are all ready to be launched when camp opens. The Timanous swimming dock has been entirely rebuilt and it is hoped that the ice will not carry it away this winter as it has other years. Many of the cabins have been stained and steps and railings have been repaired and renewed when needed. Men work until the snow comes and even after that there is more to do. The wood has to be cut, split, and stacked and, of course, the ice is cut during mid-winter. Dave Crockett and Ossie Jewett work during the winter and they secure extra helpers during the fall and spring.
